

N-able Cloud Commander™

Unlock unparalleled efficiency with our exclusive multi-tenant solution for Microsoft's cloud: N-able Cloud Commander. Seamlessly monitor, secure, and streamline your Microsoft 365 users, Intune devices, and Azure resources. Give your service desk the tools they need to eliminate portal hopping, quickly remediate common user and device tasks while administrators can elevate their security game with Microsoft Security Score reporting, license and subscription management across all your tenants in a single console.

N-able Cloud commander is available for Microsoft CSPs (direct and indirect), offering multi-tenant capabilities for MSPs. Prioritize security with Least Privileged Access, ensuring precise access rights for clients and team members, bolstering safety. Unleash informed decision-making by using comprehensive dashboards, reporting, and list exports. Simplify your Microsoft cloud management, enabling effective control, security, and insightful analysis for optimal outcomes. Unlock the potential of your Microsoft cloud with our cutting-edge solution, tailored for streamlined technician's workload, robust security, and informed strategic choices.

Microsoft 365 user management:

- ▲ Efficiently handle multi-tenant user tasks, from on/offboarding to license assignments.
- ▲ Streamline subscription and license management, including self-service actions for clients (direct CSPs).
- ▲ Utilize Microsoft Entra ID (Azure AD) to control groups, roles, and hybrid environments.
- ▲ Empower yourself with seamless Microsoft 365 management, ensuring a hassle-free experience.
- ▲ Keep your data safe with our Risky Users management and quickly take action to remediate.

Intune Device and policy management:

- ▲ Effortlessly oversee your Microsoft Intune devices.
- ▲ Access a comprehensive device listing and drill down into crucial information with ease.
- ▲ Take prompt actions, such as enrollment and de-enrollment, to streamline routine tasks efficiently.
- ▲ Manage Intune device profiles and compliance policies, enabling cross-tenant global policies to be more consistent seamlessly.
- ▲ Elevate security with Intune compliance policy management, including secure scoring and actions for policy deviations. With our product, maintaining Intune devices becomes intuitive, enhancing your control and security across the board.

Azure Resource Management:

- ▲ Seamlessly handle Microsoft Azure resources.
- ▲ Acquire complete Azure resource visibility, enabling insightful drilldowns, in-depth reporting, and clear VM dependency observations.
- ▲ Effectively monitor Azure VM performance, promptly receiving alerts for efficient issue resolution.
- ▲ Utilize Azure Resource Dashboards to access real-time Azure VM status updates and actionable intelligence.
- ▲ Perform quick, streamlined actions like VM start, stop, restart, and efficient deployment of N-able agents.

Feature List

Cloud Commander Core

- ▲ CSP Onboarding Wizard
- ▲ Technician Least Privileged Access
- ▲ Manage Microsoft Portal Access and Roles
- ▲ Microsoft Power Automate Connector
- ▲ Microsoft Secure Score Reporting
- ▲ Risky Users & remediation

- ▲ Azure Resource List
- ▲ Azure VM drill down
- ▲ Azure VM Power Management
- ▲ Azure VM Performance Metrics (last 24hrs)
- ▲ Azure Monitoring Alerts Reporting
- ▲ Summary Dashboard - Resources by Health Status
- ▲ Summary Dashboard - Alerts by Severity
- ▲ Summary Dashboard - Virtual Machines by Power State

Intune device and policy management

- ▲ Device Management Actions
- ▲ Comprehensive Device Details
- ▲ Intune Configuration Profile Management
- ▲ Intune Compliance Policy Management

A solution that helps all roles in your business:

How we help

Front line IT staff

Do you find it challenging to keep up with logging in from one client to the next and jumping between multiple cloud tools like Microsoft 365, Intune, and Azure while handling tasks such as onboarding new users, resetting passwords, and editing permissions as a front-line IT technician managing Microsoft Cloud?

N-able Cloud Commander provides techs with the ability to quickly and easily gain visibility and insights into their Microsoft cloud environment. Cloud Commander enables techs to save time through quick access and action on VMs, devices, and users.

IT Managers

Do you believe that dedicating staff solely to manage Microsoft's cloud products is necessary at times? Are you concerned about the time it takes to handle setups that are not multitenant, ensure consistency in policies across customers, and achieve better visibility into the scope and costs of your Microsoft environments given the potential high overhead?

N-able Cloud Commander empowers IT managers to overcome obstacles in managing Microsoft cloud solutions. With multi-tenant access, seamless management across clients is enabled. Streamlined features like user and licensing management, subscription management, and user visibility ensure consistency and control. Efficient policies, Secure score reporting, and integration with Power Automate alleviates manual tasks. Drives efficiency, reduces overhead, and enhances visibility to stay profitable.

IT Directors

In your role as an IT director, do you find it to be your responsibility to oversee aspects such as security, compliance, cost control, and continuous improvements within Microsoft cloud environments? Are you encountering challenges in effectively handling complexities, scalability, updates, maintenance, staff training, troubleshooting, and security while striving to establish efficient operations using the tools provided by Microsoft?

N-able Cloud Commander is the ultimate solution for IT directors, addressing the challenges of managing Microsoft cloud environments. With multi-tenant access, efficient user and licensing management, Microsoft subscription management, policies, and configuration control. IT Directors looking to drive both technician efficiency, security, and profitability can leverage Cloud Commander's reporting to help improve operations, drive down Secure Score risks, and optimize client spend.

Security and technical specialists

As a security or technical IT specialist, do you consider the establishment of consistent configurations, profiles, and policies that enforce standards and compliance to be crucial? Are you facing challenges in achieving this, particularly when managing customers individually and through multiple technicians? Furthermore, do you see a need for advanced functionality that facilitates specific workflows and processes in your role?

N-able Cloud Commander equips cloud and security specialists with key capabilities such as multi-tenant access, policies and configuration management, Least Privileged Access, Intune compliance management, Secure Score Reporting, Risky User management and actions. With Cloud Commander they can overcome the difficulties of managing configurations and policies while enjoying advanced functionality for streamlined workflows.

VP/C-level/Owner Operator

As a business leader, have you observed that your teams are being driven to reshape their departments to align with future requirements? Have you noticed shifts in partnerships, margins, and benefit structures concerning Microsoft? Despite the evolution of tools, do you find that you are still investing significant staff hours to ensure the desired level of quality and quantity of service for clients, especially in the realm of cloud workloads?

IT executives face the daunting task of aligning their businesses with future needs, navigating changes in partnerships, margins, and Microsoft benefit structures. Despite tool advancements, staffing challenges persist, with heavy investments required to meet quality and quantity standards for clients, especially in cloud workloads. Our empowering product tackles these issues head-on, to help streamline operations, optimize staffing, and excel in supporting your service delivery.

About N-able

N-able, Inc. (NYSE: NABL), the solutions partner helping IT services providers deliver security, data protection, and remote monitoring and management services. N-able fuels IT services providers with powerful software solutions to monitor, manage, and secure their customers' systems, data, and networks. Built on a scalable platform, we offer secure infrastructure and tools to simplify complex ecosystems, as well as resources to navigate evolving IT needs. We help partners excel at every stage of growth, protect their customers, and expand their offerings with an ever-increasing, flexible portfolio of integrations from leading technology providers. n-able.com
